NOAH ENEMALI

Johnnoah620@gmail.com | +2348137616290 | Lagos

Summary

Results driven Software Developer with 4+ years building scalable backend services and high performance frontend applications. Expertise in PHP (Laravel), JavaScript/TypeScript, RESTful APIs, and SQL/NoSQL databases. Track record of delivering production grade systems across web platforms, automation workflows, and blockchain solutions (Solidity, Ethers.js, Polygon). Known for technical leadership, cross functional collaboration, and turning business requirements into secure, maintainable software.

Skills

- PHP
- JavaScript
- TypeScript
- SQL
- Python
- PHP Laravel
- MongoDb
- SQL
- Polygon
- Wallet Authentication
- DApp Architecture
- Ether.js

- Solidity
- Git
- Linux
- PowerBl
- Hardhat
- Problem-solving
- Test automation
- Time management
- Problem solving
- Team collaboration
- Technical leadership
- Project management

Experience

11/2021 - Current
Freelance
Lagos , Nigeria

Software Developer
- Built scalable backend systems, including migrations, controllers, services, and APIs to enhance application performance.
- Developed secure authentication systems and role based access controls, ensuring robust security measures.
- Designed and optimized relational and non relational databases for improved performance and scalability.
- Integrated third-party APIs and automation tools to streamline workflows and enhance functionality.
- Delivered clean, documented, production quality code while utilizing Agile methodologies for efficient project management.

09/2025 - 10/2025
Chidon kitchen worldwide
Lagos , Nigeria

Website developer (contract)
- Developed full-stack e-commerce website utilizing Firebase and JavaScript to streamline product ordering.
- Conducted performance analysis to enhance website loading times, improving user experience.
- Optimized websites for search engines, significantly increasing visibility and organic traffic.

10/2024 - 08/2025

NACOS Mountain Top University

Ogun State , Nigeria

President

- Led student technical association, organizing Project Q MTU, the largest inter-school tech fair, coordinating teams, sponsors, budgets, and event execution.
- Promoted a culture of software development and innovation among students through initiatives enhancing engagement and participation.
- Championed diversity and inclusion initiatives, fostering a welcoming environment while providing leadership on budgeting decisions to optimize available resources.

06/2023 - 08/2025

Block Records

Lagos , Nigeria

Technical Lead

- Implemented backend systems that enhanced content and data workflows for music label operations.
- Led digital infrastructure and technical strategy, optimizing website architecture and deployment processes.
- Managed automation tools and reporting pipelines, ensuring efficient data analytics and project execution.

01/2023 - 10/2024

Linar School of Media & ICT

Data Analyst Intern

- Utilized Python for data manipulation and analysis, significantly enhancing workflow efficiency.
- Automated data processing tasks through scripting, leading to improved productivity.
- Created SQL queries to extract relevant information from relational databases for diverse projects.
- Collaborated with cross functional teams to develop analytics solutions, driving value added insights. Built interactive dashboards using Power BI to effectively visualize key performance indicators.

02/2019 - 09/2022

Freelance

Portharcourt , Nigeria

WordPress Developer

- Built and customized WordPress websites for diverse clients, enhancing online presence and functionality.
- Developed responsive designs to ensure compatibility across various devices, improving user experience.
- Implemented SEO best practices to drive organic traffic, significantly increasing site visibility for client websites.

01/2018 - 08/2021

Freelance

Portharcourt , Nigeria

Information Technology Support Specialist

- Provided cybersecurity guidance to minimize risks for users, enhancing overall safety protocols.
- Evaluated hardware upgrades to improve system performance and reliability for clients.
- Configured and installed computer systems and software, ensuring optimal functionality.
- Troubleshot hardware and software issues, delivering effective remote technical support across various operating systems.
- Conducted training sessions for users to enhance their understanding of software applications and IT tools.

Education and Training

Ogun State, Nigeria

Bachelor of Science in Compter Science

MOUNTAIN TOP UNIVERSITY

- President of National Association of Computing Students Mountain Top University Chapter
- Recipient of D.K. OLUKOYA FOUNDATION scholarship

Hobbies and Interests

- Travelling

- Cooking

Projects

Quirlo, A hybrid blockchain-based social platform using Next.js and Polygon, enabling token-based user rewards and AI moderation. Integrated a mining logic using user devices.

Carmony, Marketplace for cars using escrow wallet system (Next.js, TypeScript), https://carmony.vercel.app

Skillsoft Jobs - Job Listing Platform, Built the PHP version then later with Laravel, the job platform with CRUD operations and role-based access Clean MVC structure and reusable components.

Vendora Backend (Laravel), A full marketplace backend with multi-role authentication (admin/vendor/user), vendor approval flow, product management, orders, notifications, and basic analytics.,
https://github.com/noahdevelopsio/vendorabackend

Smart Contract Utilities (Internal), Token transfers, ownership logic, contract deployment scripts.
